RESIDENTIAL AGED CARE: TELL US YOUR RESEARCH PRIORITIES

Researchers from the [National Centre for Healthy Ageing Residential Aged Care Research Network \(RACReN\)](#), want to hear what you think are the **most important** areas to research in residential aged care in Australia.

This information will be shared with aged care researchers to make sure they are researching what matters most to everyone involved in residential aged care.

We want to hear from you if you:

- Have a family member or friend that is living, or has lived, in a residential aged care home;
- Live in a residential aged care home; OR
- Work in or with a residential aged care home - this includes PCAs, nurses, all staff, and visiting allied health and primary care clinicians, providers, funders or researchers.

Participation involves completing 2-3 short surveys (10-30 minutes) over the next few months.

To learn more and start the first survey,
scan the QR code or enter the survey
