

Dementia Training Australia - Additional Resources

1. Access to Resources at the Dementia Training Australia Website

- Dementia in Practice podcast episodes
- Online courses for GPs – from 40mins to 4hrs
- Downloadable GP resources – Management plans and Supervisor teaching plans
- GP related events
- GP workshops
- Links to other helpful websites

Click on this link: [Dementia Australia Training GP Resource Hub](#)

2. Access to Dementia Training Australia recorded webinars with RACGP

If you would like to review content from the day, please access the on-demand webinars available on the RACGP website. Simply click on the links below.

[Reframing dementia – Applying GP-friendly frameworks to better understand dementia](#)

Learning Outcomes

- Recognise features other than memory loss in people with dementia by applying the Domains Framework
- Apply the Inclusion Criteria Framework in assessing patients for a possible diagnosis of Alzheimer's dementia
- Apply the Exclusion Criteria Framework in assessing patients for a possible diagnosis of Alzheimer's dementia.

[Dementia diagnosis demystified – A stepwise approach to diagnosing dementia in general practice](#)

Learning Outcomes

- Implement a stepwise approach to taking a history from a person with possible dementia, including a collaborative history from their family and/or carers
- Implement an evidence-based approach to ordering investigations for a person with possible dementia
- Integrate cognitive screening tests as part of assessing a person with possible dementia
- Apply person-centred care when offering a dementia diagnosis.

[Dementia management demystified – A stepwise approach to initiating the post-diagnostic care of dementia in general practice](#)

Learning Outcomes

- Apply a patient-centred stepwise chronic disease management approach to the post-diagnostic care of dementia
- Explain the role of medications in the post-diagnostic care of dementia
- Describe the role other health practitioners can play in the post-diagnostic care of a person with dementia.

3. Optional Self Reporting CPD activities

Attached to this email will be 3 optional self-reporting CPD activities. These activities include the following topics:

- Driving Assessment
- Identifying Mild Cognitive Impairment
- Implementing a Brain Health Check as part of the 45 – 49 year old health assessment

You may choose to 1, all or none! Any questions, please email Jenny at j.vibert@latrobe.edu.au
