Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

To support the primary health care based COVID-19 pandemic response including the national roll out of the COVID-19 vaccine program to deliver booster doses to this cohort, while continuing the primary course vaccination work

Description of Activity *

To continue to commission primary care vaccination providers to support and coordinate activities in their regions that enable the delivery of vaccinations to vulnerable populations. These are targeted, short-term local solutions to supplement existing activities and arrangements. Including:
• COMMUNICATIONS
Local advertising on socials, display, public transport, print and radio to promote vaccine availability across the Gold Coast region
Development and publication of culturally appropriate communication materials bespoke for the Gold Coast region
• HOMEBOUND VACCINATIONS
To support the ongoing work vaccinating homebound individuals
Commissioning of health service/s to provide in-home vaccinations and boosters as required
Provide funding support to the vaccination provider to contract/engage additional staff to support vaccinations including engagement of short-term clinical, administration and auxiliary staff.
• GENERAL PRACTICE MBS REIMBURSEMENT
General Practice MBS equivalent reimbursement for non-Medicare eligible people

Core AWP 2022-23 50 2024-25

Paying an equivalent MBS reimbursement for vaccination of a person without a Medicare card

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

To support the primary health care sector and workforce in the COVID-19 pandemic response including the national roll out of the COVID-19 vaccine program and booster doses.

Description of Activity *

This program of work incorporates a coordinated support program to the key stakeholders identified including general practice, residential aged care, and Aboriginal medical services. The support program includes:
• Commissioning additional medical services to provide face to face assessment and management of people who are COVID-19 positive without a usual GP or where the usual GP is not able to provide face to face care
• Access to COVID-19 specific information via webinars and electronic communications
• Access to COVID-19 related resources via a dedicated webpage
• Maintenance of and update of COVID-19 pandemic response Health Pathway and COVID-19 vaccine Health Pathway

This activity also supports the local Gold Coast General Practitioners, other Primary Health Care providers, and the Gold Coast population to access credible and reliable information associated with the COVID-19 pandemic response and COVID-19 vaccine program.

Activity Title *

Chronic Disease Management - Turning Pain into Gain

Existing, Modified or New Activity *

Modified

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

This activity:
• promotes improved primary care and chronic pain management through assessment, self- management training, education, and peer support to patients, with limited access to allied health services where required.
Expected results of this activity include the following local performance measures:
• improved patient's confidence in self-management.
• Improved patient reported clinical outcomes and overall patient satisfaction.
• Improved general practitioner's confidence in managing patients with chronic disease management
• Improved patient reported clinical outcomes and overall patient satisfaction.
• Improved clinician reported experience of care and workforce satisfaction.

Description of Activity *

Turning Pain into Gain is an innovative primary care model of service delivery which combines a number of evidence-based interventions to deliver a patient centred self-management program with the following service components included:
• Individual patient assessment including support to navigate to appropriate service providers and recommendations to patient's GP

- Patient self-management education program
- Access to digitally supported cycle of care decision support tools and resources for healthcare providers
- Access to Additional Allied Health Services where required in addition to MBS funded services.
- GP and Allied Health Education Program
- Peer to peer support group
- Refresher workshops for participants at 6 months, 9 months and 12 months' post program.

Activity Consultation and Collaboration

Consultation

This program was originally designed and developed in consultation and collaboration with GCH specialist pain and chronic disease services, General practitioners, allied health, public and private specialists.
Local provider has developed a strong reputation and respect across the primary and secondary care system within the Gold Coast and nationally.

Core AWP 2022-23 50 2024-25

Collaboration

The activity involves ongoing collaboration:
- Gold Coast Health/Integrated Care Alliance
- Joint work to support the development of this activity and to support ongoing implementation and maintenance of the redesigned models of care.
- GPs, allied health and other primary care providers, public/private specialists.
- Referrers to the program and access to education sessions
- Contractor
- Delivers the program in collaboration with a range of specifically identified allied health providers (who have undergone an audit process to ensure suitability and alignment to program outcomes)
Gold Coast Hospital and Health Services
- GCH Specialist Pain Clinic
Collaboration with Provider to ensure alignment of programs and effective use of referral pathways by specialists and general practitioners.

Activity Title *

Chronic Disease Management - Wound Management

Existing, Modified or New Activity *

Modified

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

This activity:
• Promotes evidence - based resources including reference sites, guidelines and pathways to assist participating primary care clinicians with wound management in their own clinical setting to include direct clinical supervision and professional development of participating nurses and general practitioners at the Chronic and Complex Wound Clinic.

Expected results of this activity include the following local performance measures:
• improved patient's confidence in self-management,
• Improved patient reported clinical outcomes and overall patient satisfaction.
• Improved general practitioner's confidence in managing patients with chronic disease management
• Improved patient reported clinical outcomes and overall patient satisfaction.
• Improved clinician reported experience of care and workforce satisfaction.
• Reduction of PPH related to chronic wounds

Description of Activity *

The Chronic Disease Wound Management Activity promotes improved primary care management of chronic and

complex wounds by providing a primary care based service an alternative to hospital based service. .

The Chronic Wound Management Service is an innovative primary care model which combines a number of evidence-based interventions to deliver a patient centred model of care with the following service components included:
• Ongoing implementation of a primary care- based model (GP specialist and Nurse Practitioner wound clinic) of care for patients with chronic and complex wounds whilst maintaining close relationships with the patients' usual general practitioner and tertiary services.
• To increase capability of the general practice workforce to manage chronic and complex wounds by providing wound management training workshops for GPs and nurses
• To promote access and use of evidenced-based guidelines, resources, templates and chronic wound management planning templates to all clinicians on the Gold Coast

Access to timely GP and Nurse Practitioner wound specialist advice via phone for clinical support and training.

This activity addresses the needs by providing coordinated and integrated health services focused on provision of evidence-based interventions, and information through a medical home model.

Activity Priorities and Description

Program Key Priority Area *

Other (please provide details)

Other Program Key Priority Area Description

Aboriginal and Torres Strait Islander Health and Culturally and Linguistically Diverse Populations

Aim of Activity *

To increase and improve the access and referral pathways to health and related services for people who identify as Aboriginal or Torres Strait Islander. To highlight well-established, trusted and respected service providers already specialising in engaging with hard-to-reach groups, to provide an integrated approach to navigating services and enhancing cultural awareness and understanding across the Gold Coast region.
For example:
• Primary and secondary health care services including mental health, Alcohol and drug treatment and suicide prevention services as well as other chronic disease services.
• Child and Family services
• Homelessness services
• Legal services
• Financial support services
• Housing services
• Employment services
• NDIS

Description of Activity *

Continued quality improvement towards the service delivery will be monitored and reported against, with a continued focus to improving health and social outcomes for hard-to-reach groups in the Gold Coast region. This is being achieved through:
• Increasing awareness of and maximising links between services for Aboriginal and Torres Strait Islander people, including those provided by Commonwealth and state/territory governments, AMSs, and other specialist organisations.
• Supporting services across the health and social sectors to educate, develop and implement strategies to improve access to primary care for Aboriginal and Torres Strait Islander people, i.e. supporting self-identification, providing coaching support to mainstream health provider, providing advocacy on behalf of people accessing services.
• Collaborating with local Indigenous health services and mainstream health services in a partnership approach for the delivery of primary care services to Aboriginal and Torres Strait Islander people.

5

Activity Title *

Alcohol and Other Drugs Home Detox Program

Existing, Modified or New Activity *

Modified

Activity Priorities and Description

Program Key Priority Area *

Alcohol and Other Drugs

Other Program Key Priority Area Description

Aim of Activity *

Note: This activity is connected to 2020-21 AH3 Alcohol and Other Drugs After Hours – Treatment
This activity aims to pilot an in-home withdrawal management (detox) program in the Gold Coast region.
• Increase availability of withdrawal management treatment
• Increase timely access to withdrawal management treatment
• Improve continuity of care for clients accessing treatment through supported transition of care between services, particularly on completion of detox and into residential rehabilitation
• Improve AOD treatment outcomes for clients
• Reduce harm associated with drugs and alcohol use, with a focus on methamphetamine use

Description of Activity *

Home Detox program
This activity will see GCPHN co-fund in partnership with QuIHN, an innovative and much needed in-home detox program within the Gold Coast region. The program will be a pilot to support the development and testing the feasibility and efficacy of the model, which will see the provision of home visits to clients engaged in the detox program and support these clients safely through detox in their own homes.
Withdrawal Care Guidelines have been developed to support the delivery of this program. These are evidence-based guidelines that were developed for QuIHN clinicians that will enable them to support their clients in

conjunction with the medical team who are engaged in the program to safely manage the withdrawal period.
Service Model details:
• The program will be delivered by an experienced Nurse Practitioner (alcohol and drugs) in collaboration with a Registered Nurse.
• The Nurse Practitioner will lead the development of a service model that includes assessments, risk management, policies and procedures.
• Clients of the program will be (based on assessment criteria):
o Individuals who are existing clients of QuIHN identified as requiring detox
o Individuals seeking detox who are referred directly to the program from eligible referrers
• Prior to undertaking a home detox, the client will be assessed for additional health concerns, risk assessments will be undertaken, support plans will be developed and implemented and a contract with the client entered into to commence the treatment.
• Some individuals who complete the detox program will require further treatment in residential rehabilitation or through outpatient rehabilitation programs. QuIHN will work in partnership with external agencies to support identified clients to transition to the required service.
• This service will not be provided to clients seeking to detox from severe alcohol use, who will be referred to residential detox services.
QuIHN will undertake an external evaluation for this trial program in collaboration with GCPHN. Evaluation of the program is expected in mid 2023.

Activity Consultation and Collaboration

Consultation

Withdrawal management and detox treatment has consistently been identified as a high priority in the region. Gold Coast providers experience high demand for treatment and report difficulty accessing detox services for clients who require this treatment prior to entering residential rehabilitation.

This need has been identified over several years throughout various co-design processes for AOD and mental health services, during AOD specific capacity building working groups and the development of PHN needs assessments.

The Joint Regional Plan consultation has highlighted the absence and need for more of, and alternative models of, detox treatment and has built on the intelligence we had in relation to the complexity of accessing detox at the right place, at the right time and by the right service.

In the development of the model, QuIHN has undertaken a range of planning and their own consultation process internally and externally to the service.

Collaboration

Stakeholder/Partners:
• Gold Coast Health: Collaborative working relationship, Referrals
• Aboriginal and Torres Strait Islander services, mental health services: Referrals
• AOD and mental health services: Collaborative working relationship, Referrals
• General Practice including after-hours services: Service information and referrals

Activity Title *

Primary Sense™ Population Health Management and audit tool

Existing, Modified or New Activity *

Existing

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

Primary Sense is as an evidenced based decision assist tool to help inform timely decisions for better primary healthcare. The program involves full adoption of the national scale version of the Primary Sense (version 2.0) product for use by PHNs nationally through the Lead PHN WAPHA, hosted on the Primary Health Insights Platform. This program supports the PHN to implement the tool set to support Gold Coast general practices to care for their respective populations by:
• integrating diagnosis, medications and pathology data from practice management system and applying evidenced based algorithms · identifying high risk groups for proactive care
• providing point of care decision assist for GPs though medication safety alerts and prompts for interventions
• relaying analysed de-identified patient information as data becomes available, enabling the practices to plan and coordinate care in an efficient way so patients get the right care at the right time.
• providing clinical audit functions e.g. pre-accreditation data checks, and a risk stratified profile of the entire practice patient population including high impact conditions, multi-morbidity and polypharmacy profiles.

Primary Sense will also enhance the level and detail of integrated and primary care service planning that the PHN can do based on historic and current de-identified patient level, practice level, and regional level data, enabling predictive modelling and tracking outcomes over time. Increased use by PHNs through the national PHI Primary

Sense v2.0 will enable this view to expand to provide a national data collection across a majority of states and territories. Primary Sense also has value to state and territory health services by enabling a practice-based population health management approach to reduce unnecessary hospital use, by
• Correctly identify which patient groups are suitable for appropriate evidence - based interventions at a local (GP) and regional (PHN) level
• Correctly identify patients at risk of poor outcomes on a state/territory level
• Enabling patients to be more effectively managed in primary care and avoid preventable hospitalisations and ED presentations in hours, and after hours

Description of Activity *

Rolling out and fully implementing the scaled up national version of Primary Sense (version 2.0) will ensure PHNs a more attractive, cost effective and value adding toolset to support the broad range of PHNs commissioning functions, enhancing the national infrastructure and value from the PHI (Primary Health Insights) platform. GCPHN having handed over the Lead PHN role for Primary Sense v2.0 to WAPHA under the PHI platform will instead focus its efforts in driving meaningful use of Primary Sense across our general practices and within the local health system through jointly developing proof of concept integrated care demonstrator projects. Primary Sense v2.0 will provide general practices an automated Primary sense tool set that provides de-identified data extraction and analysis of the health profile of the entire practice population - generating actionable reports and medication safety alerts and Prompts for interventions. The architecture and resulting data and analytics will be housed within PHI.
The analysed population health data for the practice is used to inform the service response, and for GCPHN commissioning purposes:
• Highlights patients with complex and comorbid conditions to target proactive and coordinated care · Highlights patients at risk of hospitalisation for coordinated care (some cross over with group above)
• Highlights patients at risk of chronic disease to target proactive health assessment
• Highlights patients at risk of polypharmacy for medication review
• Alerts to patients at immediate risk from medication prescribing safety issues related to avoidable admissions, ED presentations and potential mortality rates.
• Prompts for missing interventions for the most at risk patients during the consult with the GP
Primary Sense is compatible with Medical Director and Best Practice software (comprising approximately 90% of the general practice software market in the Gold Coast). Work is in development by WAPHA development team to complete mapping to be compatible with ZEDMED and Genie products also.

The Primary Sense v2.0 tool set needs to be maintained and regularly updated from a clinical and functional perspective. The national scaled version under the PHI will also increase the ability to develop, test and increase performance efficiencies. Scaling activities enable a supported IT helpdesk model for practices and PHNs nationally. Further programming of medication safety alerts, GP care prompts and reports will continue based on national PHN priorities, user feedback, and advice from key clinicians and academics. System and process enhancements may include
• Optimising care/service navigation for selected populations based on demographics or diagnoses
• Automated access to the Australian Immunisation Register from in the practice
• Automation and time stamping of patient consent collection at the practice
• Targeted patient selection and alerts for research project recruitment
• Outcome monitoring for health activities – such as reduced adverse medication events
• Audit and feedback for GP trainee education
• Automated chart review for GP training and professional development
• Linked databases to better understand potentially preventable hospital admissions
• Quality Improvement Clusters – peer review process
• Public Health – automated post-market surveillance. Post immunisation adverse event tracking
• Public Health early warning of emerging outbreaks/symptom clusters

Digital Health

Other Program Key Priority Area Description

Aim of Activity *

To provide commissioning excellence support to the PHN and partner activities towards supporting one world class health system for the Gold Coast and supporting high performing primary care.

Description of Activity *

This activity provides the commissioning systems support for the PHN's activities including Flexible Funding, Health System Improvement, General Practice Support, After Hours and Other Funding programs including ITC, MH, AOD, Palliative Care and Aged Care. The activity provides the following functions and resourcing:
• Needs assessment and annual planning
• Market assessment and Service co-design
• Procurement and contracting
• Performance monitoring, Quality Management, Risk management, Innovation and Evaluation
• Stakeholder Engagement, communications and marketing promotions
These activities enable the primary health care sector, professionals and community informs, engages in and shapes the evaluation of current primary and intermediate care services as well as shape future services through:
• Ensuring primary care and community inform the annual and specific needs assessment activities
• Involving primary care sector and community in market assessment and service co-design

• Supporting primary care sector to engage in and inform commissioning through procurement and contracting activities
• Providing data and information to the primary care sector that assists in their decision support and driving quality improvement of services and improved patient outcomes including support, promotion and navigation to the Gold Coast streamliners healthpathways infrastructure and for related digital health systems like SmartReferrals
• Ensuring high quality, comprehensive and timely organisational systems that enable internal and provider performance monitoring and reporting, including all DoH and other funding body reporting deliverables
• Maintaining comprehensive Quality Management Systems and Accreditation to support quality assurance of our products, services and processes, a mature risk management framework and Innovation, Research, Service review and Evaluation frameworks
• Providing mature and comprehensive stakeholder engagement, relationship management, communications (traditional and online) and Commissioned services and program promotion campaigns; informing, engaging in and contributing through an extensive set of communications and engagement channels and programs

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

This activity aims to provide general practice, consumers, primary care sector and community providers with access to readily available, evidence-based information, resources, service and referral options, tailored specifically to the Gold Coast region through an extensive set of communications and engagement channels and programs particularly including GCPHN's web online publication platform. Information is provided about GCPHN, our programs, services, health literacy information for key health needs and service issues through a stable, reliable, accurate, localised digital platform for general practice, primary care service providers and the broader community to access the necessary curated, up-to-date information and resources that support access to service options, referral and optimal care management.
The activity aims to achieve the following National PHN Performance Framework targets:
• P1 - PHN activities address prioritised needs and national priorities
• P4 - Support provided to general practices and other health care providers
• P7 - Rate of GP style emergency department (ED) presentations
• O14 - PHN stakeholder engagement

The activities ensure that the primary health care sector are kept informed about service access, referral pathways, needs assessment, planning and co-design of current primary and intermediate care services, as well as promote

opportunities to shape future services through:
• Providing health service access and referral information about available services, pathways and e-referral templates for the Gold Coast region
• Ensuring primary care informs the annual and specific needs assessment activities
• Communicating opportunities for primary care sector in market assessment and service co-design
• Supporting primary care sector to engage in and inform commissioning through procurement and contracting activities
• Providing data and information to the primary care sector that assists in their decision support and driving quality improvement of services and improved patient outcomes.

Description of Activity *

The activity addresses the needs through delivery of a patient-centred, coordinated, curated online information and resources platform, including but not limited to local service options, GCPHN and our programs and services, referral options, health pathways and links to the new Gold Coast Streamliners' HealthPathways site and health literacy information on key health needs and service issues.
GCPHN will continue to host, develop the I.T. infrastructure, update and market the existing GCPHN web portal featuring:
• localised referral guidelines and templates for PHN funded services and some private providers
• Review and update of existing referral templates
• An e-library of professional resources and educational material
• patient-facing resources
• promotion of HealthPathways information across a number of prioritised service areas/health issues
During 2022/23 to 2024/25, priority will be given to increasing pathways information to support improved navigation and access to local service provider information in PHN priority areas and other locally identified health topic areas, to ensure information and resources published online are kept current and appropriately curated to support appropriate, timely referrals and agreed service pathways. Particularly with respect to Aged Care and Dementia HealthPathways AWP. The outcome of this work identifies effective ways to increase communication, awareness and referral and service pathways between service providers and improve user experience in line with contemporary e-solutions.
The activity includes linking and liaison with the National Health Service Directory and other related directories to ensure effective information sharing.
This activity links closely with practice support activities and other program activities, including the hosting of referral templates, resources and information to support local health decision assist tools, including:
• referral templates
• resources, clinicians and consumers
• professional development
• resource directory
Expected results include achieving increased access to contemporary evidence-based resources and localised service and referral information.

Other Program Key Priority Area Description

Digital health and area population health

Aim of Activity *

Also relates HSI 2 Access to information and resources as the publication portal for Gold Coast health pathways information and resources. The work also relates to the Greater Choices for at home palliative care program activities, Population Health Primary Sense Activity and the new Aged Care activities.

Overall Program Objectives:
Create a single integrated healthcare system for the Gold Coast by:
• Improving the coordination of care to ensure consumers receive the right care at the right place at the right time by the right person.
• Increasing the effectiveness and efficiency of health services for consumers.
• Engaging and supporting clinicians to facilitate improvements in our health system.
The aim of GCPHN's contribution to this program is to accelerate learnings from local innovation and previous integration projects in a Proof-of-Concept (PoC), incorporating the learning from the GCIC program, and building on service design opportunities using Primary Sense, while augmenting the potential benefits that implementing Streamliners HealthPathways and Smart Referrals bring to the Gold Coast region.

Initial phase of the project will be a specific Gold Coast case study to develop a novel technologically enabled

innovation pathway for the health systems. This will demonstrate the management and scale-up of the digital transformation through helping to optimise the treatment pathway across providers, improving the efficiency of the health system and optimising patient outcomes. Revised co-designed new pathways for prioritised areas of care are being developed as proof of concept (PoC) demonstration project/s for this work.

Description of Activity *

Based on integrated models of care for the prioritised diseases/conditions, already developed, this activity seeks to accelerate learnings from local innovation and previous integration projects in a Proof-of-Concept (PoC), incorporating the learning from the GCIC program, and building on service design opportunities using Primary Sense, while augmenting the potential benefits that implementing Streamliners HealthPathways and Smart Referrals bring to the Gold Coast region.

The proposed PoC demonstrator project is a multi-party and multi-disciplinary collaboration between GCPHN, GCH, and Queensland Department of Health. The project combines clinical expertise from across health systems with local innovative technologies. QH's involvement is also being sought to ensure alignment with emerging virtual care strategic priorities and to provide research, ethics and governance, scale up funding and policy advice as well as resources to support the PoC. Deloitte are being commissioned to develop high level evaluation (cost/benefit) framework that can be applied to this work in the future.

This model will be supported by advances in technology to demonstrate how, by being data driven, systems can personalise patients' healthcare and improve their health outcomes. The model involves connecting and promoting clinical collaboration across the Gold Coast region to ensure optimal use of the limited health system resources. The PoC will bolster primary care capacity across the Gold Coast and enable us to work across the system to better collaborate for the benefit of our patients. It is expected to potentially demonstrate how this model could be of value, at scale, if rolled out across Queensland.

Primary Sense incorporating the Johns Hopkins University's ACG risk stratification tool systematically promotes prevention and secondary prevention pathways that enhance care of those with complex issues within the GP's workflow, including chronic disease in the community through optimising management in the primary care setting. Importantly, using the Primary Sense and the John Hopkins University ACG risk stratification tool can create a pathway for the right care to be provided to all Queenslanders regardless of location, and support access to the right care at the right time.

Needs Assessment Priorities *

Needs Assessment

GCPHN Needs Assessment_2022

The proof-of-concept Demonstrator integrated pathway will be codesigned between Gold Coast general

Core AWP 2022-23 50 2024-25

practitioners and the GCH Specialist Department. This work will engage broader stakeholders and consumer representation.

Historically, between the period 2017-19, co-design involved over 200 clinicals through over 50 workshops over a 12-month period to design optimal model of care for 20 high use conditions are determined by clinicians. The results of the workshops were developed into draft models of care that were reviewed by the clinical reference group, the consumer reference group, and then approved by Alliance Leadership Group. Co-design will continue to be used to ensure that the models of care are translated into online resources such as pathways and clinical prioritisation criteria to enable seamless transfer of care between clinicals and sectors. Primary Sense has been developed by GCPHN to support the implementation of this initiative through a population health planning, data analytics tool incorporating the Johns Hopkins University's ACG risk stratification tool.

Activity Title *

Regional mental health and suicide prevention plan

Existing, Modified or New Activity *

Modified

Activity Priorities and Description

Program Key Priority Area *

Mental Health Priority Area 8: Regional mental health and suicide prevention plan

Other Program Key Priority Area Description

Aim of Activity *

People with lived experience of mental illness, suicide, misuse of alcohol and other drugs as well as their carers face a wide range of issues when trying to access treatment and support. This includes fragmentation of services and pathways, gaps, duplication and inefficiencies in service provision, and a lack of person-centred care. The mental health, suicide prevention and alcohol and other drugs sector is underway in implementing reform with new policy directions introduced at national and state levels. While there is broad strategic alignment at a National and State level, the multiple layers of responsibility, funding and regulation create a complex environment and there is a need for a regional platform to lead this reform at a local level. Local level planning, coordination and implementation is required to achieve regional outcomes.

This activity aims to continue to progress the implementation of the Foundational Joint Regional Mental Health and Suicide Prevention Plan (the Plan) by providing oversight for regional sector collaboration. This includes supporting the sector to work better together towards shared priorities and more effectively use available resources to meet regional needs in the short term.
The Plan will also drive evidence-based service development to address identified gaps and deliver on regional priorities which have been developed and delivered in partnership with local communities.
Building on the foundational plan, the activity will contribute to more detailed joint planning in close partnership

with Gold Coast Hospital and QLD Health. This aspect of the work will be progressed in line with revised DoH guidance for this stage of the joint planning once it has been published.

Description of Activity *

Building on previous collaboration, the foundational planning process established joint governance structures between GCPHN and Gold Coast Health and delivered a Plan with shared priorities. Partnership groups have been established across key priority areas including children and youth, adult and older people, suicide prevention and alcohol and other drugs that report to the Steering Committee of the Plan. These groups will be responsible for driving the implementation of the plan and delivering against the actions. Consumers and carers, NGO service providers, general practice and other mental health service providers will continue to be engaged to progress specific coordination and integration regional priorities jointly agreed upon in the Plan.
This activity links to the activity in Mental Health Priority Area: Regional mental health and suicide prevention plan.

Aim of Activity *

Primary Sense is as an evidenced based decision assist tool to help inform timely decisions for better primary healthcare. The aim is to implement (and transition our general practices to) the national scale version of the Primary Sense product (version 2.0), that has been developed for use nationally by all partner PHNs through the PHI, so they can implement the tool set to support general practices to care for their respective populations by:
• integrating diagnosis, medications and pathology data from practice management system and applying evidenced based algorithms · identifying high risk groups for proactive care
• providing point of care decision assist for GPs though medication safety alerts and prompts for interventions
• relaying analysed de-identified patient information as data becomes available, enabling the practices to plan and coordinate care in an efficient way so patients get the right care at the right time.
• providing clinical audit functions e.g. pre-accreditation data checks, and a risk stratified profile of the entire practice patient population including high impact conditions, multi-morbidity and polypharmacy profiles.

Primary Sense will also enhance the level and detail of service planning that PHNs can do based on historic and current de-identified patient level, practice level, and regional level data, enabling predictive modelling and tracking outcomes over time. Increased use by PHNs will enable this view to expand to states and territories. Primary Sense has value to state and territory health services by enabling a practice- based population health management

approach to reduce unnecessary hospital use, by
• Correctly identify which patient groups are suitable for appropriate evidence - based interventions at a local (GP) and regional (PHN) level
• Correctly identify patients at risk of poor outcomes on a state/territory level
• Enabling patients to be more effectively managed in primary care and avoid preventable hospitalisations and ED presentations in hours, and after hours

Description of Activity *

Rolling out and fully implementing the scaled up national version of Primary Sense (version 2.0) will ensure GCPHN and other participating PHNs utilise a more attractive, cost effective and value adding toolset to support the broad range of PHNs commissioning functions, enhancing the national infrastructure and value from the PHI (Primary Health Insights) platform. GCPHN having handed over the Lead PHN role for Primary Sense v2.0 to WAPHA under the PHI platform will instead focus its efforts in driving meaningful use of Primary Sense across our general practices and within the local health system through jointly developing proof of concept integrated care demonstrator projects. Primary Sense v2.0 will be administered under the PHI for use by partner PHNs.

Primary Sense v2.0 will provide general practices an automated Primary Sense tool set that provides de-identified data extraction and analysis of the health profile of the entire practice population - generating actionable reports and medication safety alerts and Prompts for interventions. The architecture and resulting data and analytics will be housed within PHI.
The analysed population health data for the practice is used to inform the service response, and for GCPHN commissioning purposes:
• Highlights patients with complex and comorbid conditions to target proactive and coordinated care · Highlights patients at risk of hospitalisation for coordinated care (some cross over with group above)
• Highlights patients at risk of chronic disease to target proactive health assessment
Highlights patients eligible for health prevention initiatives such as cancer screening or immunisation
• Highlights patients at risk of polypharmacy for medication review
• Alerts to patients at immediate risk from medication prescribing safety issues related to avoidable admissions, ED presentations and potential mortality rates.
• Prompts for missing interventions for the most at risk patients during the consult with the GP
Primary Sense is compatible with Medical Director and Best Practice software (comprising approximately 90% of the general practice software market in the Gold Coast). GCPHN will support the work in development for Primary Sense v2.0 by WAPHA development team to complete mapping to be compatible with ZEDMED and Genie.

The Primary Sense v2.0 tool set needs to be maintained and regularly updated from a clinical and functional perspective. The national scaled version under the PHI will also increase the ability to develop, test and increase performance efficiencies. Scaling activities enable a supported IT helpdesk model. Further programming of medication safety alerts, GP care prompts and reports will continue based on based on national PHN priorities, user feedback, and advice from key clinicians and academics. System and process enhancements may include
• Optimising care/service navigation for selected populations based on demographics or diagnoses
• Automated access to the Australian Immunisation Register from in the practice
• Automation and time stamping of patient consent collection at the practice
• Targeted patient selection and alerts for research project recruitment
• Outcome monitoring for health activities – such as reduced adverse medication events
• Audit and feedback for GP trainee education
• Automated chart review for GP training and professional development
• Linked databases to better understand potentially preventable hospital admissions
• Quality Improvement Clusters – peer review process
• Public Health – automated post-market surveillance. Post immunisation adverse event tracking
• Public Health early warning of emerging outbreaks/symptom clusters

Other Program Key Priority Area Description

Practice Support, Digital Health and Population health Management

Aim of Activity *

The aim is to support general practice and other primary health care providers in the adoption of evidence based, best practice methodology and meaningful use of digital systems including Primary Sense (population health management and clinical decision support tool). To also promote quality improvement, the uptake of practice accreditation and to ensure timely provision of information, resources and education to support changes in programs and policy that impact on general practice.

Description of Activity *

Supporting general practices to deliver safe, high quality evidence-based care to their communities.
The support model provides a central point of contact for the general practice team, and other primary healthcare providers, enabling regular and targeted contact with GCPHN.
This includes:
• Help desk – to support access to information and resources that promote best practice methods
• Promote and support General Practice accreditation
• Support the use of digital health technologies such as, but not limited to, Primary Sense, e-scripts, secure messaging, telehealth, and including awareness and meaningful use of the My Health Record system
• Promote the importance of, and support the improvement of, data completeness and quality in patient records
Improve general practice staff knowledge and use of Primary Sense alerts, prompts and reports to support effective

practice level population health management particularly for those patients most at risk of poor health outcomes
Promote and support the Practice Improvement Program Quality Improvement Incentive
Enhance general practice workforce capacity and capability to use identify, plan, and implement quality improvement activities to decrease gaps in healthcare and improve health outcomes for patients especially those most at risk.
• Information to promote uptake of Gold Coast PHN programs or those provided in collaboration with other key partners including Gold Coast Health such as Health Pathways and Smart Referrals
• Informing General Practitioners, general practice team members and other primary healthcare providers of key development and changes in National, State and regional policy relevant to sector
• Collection of workforce data related to local general practices and primary health care providers to support better understanding of the primary health care services within the Gold Coast region
• Support workforce development by offering education and training opportunities aligned to evidence-based guidelines and in line with continuing professional development requirements of General Practitioners, the general practice team and other primary healthcare providers
• Proactive and strategic engagement with general practice and other primary healthcare providers through various engagement approaches in response to sector needs during the year

Activity Priorities and Description

Program Key Priority Area *

Workforce

Other Program Key Priority Area Description

Aim of Activity *

The aim is to support a skilled, local workforce for general practice and the broader primary care sector in the adoption of evidence-based best practice through workforce development activities. To also promote quality improvement through promoting to and engaging the workforce in accessing quality, targeted information, resources and education based on local assessment of needs and national priorities to support changes in programs and policy that impact on primary health care and consumer outcomes.

Description of Activity *

Supporting skilled local workforce for general practices and the broader primary care sector to deliver safe, high-quality evidence-based care to the community through a range of workforce development activities including:

• Providing workforce education and training activities for areas of identified local need
• Update the workforce development resources and infrastructure to support a more digitally enabled strategy
• Identify appropriate training providers, content experts and /or information and resources suitable for specific areas of need
• Priorities topics align with needs identified through the 2021 GCPHN Needs Assessment and include:
o COVID-19 and broader Vaccinations/Immunisation program
o Suicide prevention

Core AWP 2022-23 50 2024-25

o Cultural sensitivity
o Drug and Alcohol
o Palliative Care
o Domestic Violence
o Dementia
o Wound Management
• Maintaining and promoting training calendar
• Ensuring education and training activities are relevant to the role and level of experience and align with evidence-based guidelines, and where practicable in compliance with continuing professional development standards set by professional accreditation/registration bodies.
• Identify suitable workforce development opportunities to support the implementation of key strategies under the Joint Regional Plan for Mental Health, Suicide Prevention and Alcohol and Other Drugs, to develop more standardised skills across the sector through shared development and networking.
• Offer workforce development and education opportunities through a variety of modalities including virtual platforms and on demand training
• Maintaining well-curated educational resources for local general practice and the broader primary care sector

Data Governance

Aim of Activity *

The aim is to support the GCPHN's data governance and improve the data skills (including the use of Primary Health Insights), infrastructure, security controls, and management capabilities of the company towards the industry recognised standard (ISO 27001 or equivalent) by 2026.

Description of Activity *

Supporting skilled PHN workforce and organisational capability to meet industry recognised standards for information management data governance through a range of activities that will improve our systems, policies, and processes for data governance, as well as develop a competent capable workforce. The work program will include:

• Develop and progressively working to implement the Information management policy framework implementation strategy.
• Maintain a Data Governance Committee to oversee and provide advice on implementation of data governance across the company.
• Develop and implement the GCPHN Performance Monitoring and Reporting Business Analytics and Insight Development Roadmap.
• Maintaining and promoting mandatory cyber security and privacy compliance training calendar for staff.
• Undertaking regular cyber security and privacy compliance testing for all GCPHN staff with links to training and

development for staff.
• Establishing and maintaining registers for FOI requests and Data Breaches.
• Undertaking Privacy Impact Assessments and Data Sharing Agreements for all new data collections, as well as retrospectively developing these for historic programs and data collections.
• Undertaking and implementing recommendations from Penetration Testing of key corporate systems.
• Identify appropriate training providers, content experts and /or information and resources suitable for specific areas of need identified in the penetration testing, data breach monitoring and staff security testing program.
• Maintaining well-curated educational resources for staff and general practice on data governance, cyber security and privacy compliance.
• Support the transition of Primary Sense PHN Population Health Management Tool and primary care data (general practice) to the Primary Health Insights Platform.
• Work with other PHNs and WAPHA/Went West PHNs (as Data Analytics Centres of Excellence) to continue to develop and roll out the National PHN Data Governance Framework and other prioritised Data Governance Initiatives.
• Undertake and report on progress against recommendations from an annual audit of organisational compliance against the Essential Eight Maturity Model (Australian Signals Directorate).

Aim of Activity *

To support the health of people in the Gold Coast region through clinical referral pathway activities, supporting the development, access to, and maintenance of region-specific referral pathways for general practitioners and other health professionals.

This activity aims to:
• support access to the HealthPathways tool by primary care practitioners in the Gold Coast region
• promote best-practice care and enhance local clinician's awareness of referral options and services
• improve collaboration and integration across the health care and other systems.

The outcomes of this funding are to develop and enhance PHNs' HealthPathways content, create better linkages between primary health care services, other providers and relevant services, improve the patient journey, and increase practitioner capabilities and their quality of care.

Description of Activity *

HealthPathways
• Engage with Gold Coast Health to support funding of the HealthPathways infrastructure, including software

licensing, technical writing and programming, and clinical editor time to develop, review, maintain and enhance HealthPathways content.
• Support training, education and promotional activities that increase awareness, engagement, and utilisation of clinical referral pathways by general practice and other health professionals.
• Promote and monitor use of HealthPathways
• Consultation with local primary care clinicians, allied health, aged care providers, and other health providers and consumers to support service mapping and referral pathways to identify gaps and ensure localisation of referral pathways.
• Gather feedback from clinicians and primary care workforce on ease of use, appropriateness of information provided for clinicians and their patients, improvement suggestions, barriers and enablers to uptake HealthPathways platform.

Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description

Aim of Activity *

Need:
The Final Report of the Royal Commission into Aged Care Quality and Safety (Royal Commission) recommended wide ranging reform to the aged care system including specifically calling out the need for better access to information and advice on dementia and support services available across the dementia journey.
Aim:
The aim of this initiative is to support people living with dementia to live well in the community for as long as possible. It will support and enhance patient experience living with mild cognitive impairment or dementia, as well as their carers and family. The key objectives are to
• improve the timeliness of dementia diagnosis
• increase the uptake of post-diagnostic services and supports
enhance the ongoing care and support provided to people living with dementia, their carers and families to support them to plan ahead and better navigate their dementia journey

Description of Activity *

• Service mapping of local dementia services and supports to be maintained with quarterly reviews and edits made to service mapping consumer resources (online and hard copy) as required.
• Quality improvement feedback process developed for edits to consumer pathway resource as required including

planned consultation with local primary care providers, people living with dementia and their carers, and other relevant stakeholders.
• Dementia consumer pathway resource distribution plan to be implemented, including:
o development of an expression of interest request form for general practice
o service mapping resource to be shared with Dementia Australia to enable the Dementia Australia help desk access to a repository of Gold Coast services and supports.
o Consultation to identify key community distribution points
• Extensive promotion activities undertaken to support consumer navigate appropriate local services and supports and enhance family and carers ability to support someone with dementia.
• Consumer resource to be embedded as patient resource in Dementia pathways on HealthPathways platform
• Resource to be developed for culturally and linguistically diverse backgrounds.

Aged Care Clinical Referral Pathways

Existing, Modified or New Activity *

New Activity

Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description

Aim of Activity *

Identified need:
As part of the Government's response to the Royal Commission into Aged Care Quality and Safety (Royal Commission), Primary Health Networks (PHNs) are being funded to develop and enhance the use of existing local aged care support pathways for their region.
The funding will support better access for clinicians to information and advice on aged care support services for their patients

This activity aims to:
• Develop, monitor, review and improve aged care referral pathways relevant to the health needs of the Gold Coast region for use by clinicians during consultation with patients, to support assessment and referral to local services and supports.
• Increase awareness, engagement and utilisation of aged care pathways by local health care practitioners, including RACF staff

Description of Activity *

• Analysis of Gold Coast regional needs to inform appropriate Aged Care HealthPathways topics to be developed
• Consultation with a broad range of stakeholders to support service mapping of current services, support groups

and resources to inform localisation of referral pathways.
• Collaborate and share aged care clinical referral pathways development through the Queensland HealthPathways Coordinator network to achieve state wide consistency in clinical pathway content.
• Promote, and monitor use of, Aged Care Pathways and financially support GCH HealthPathways editing, maintaining and review of topics to ensure localisation of topics while supporting clinicians to provide best practice in the assessment, management and referral to local services and supports.
• Deliver four Wound Management workshops to RACF staff by a commissioned provider, to increase knowledge and skills in wound management and increase utilisation of Wound Management pathways and other aged care pathways to support quality, evidence based care for residents in RACFs

13

Activity Title *

Dementia Support Pathways

Existing, Modified or New Activity *

Modified

Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description

Aim of Activity *

This activity aims to:
• Improve early identification and provide appropriate resources for health care providers to care for those patients with dementia including:
o Assessment
o Diagnosis
o Management
o Referral pathways
o Support services (including carers)

• Develop, monitor, review and improve dementia referral pathways relevant to the health needs of the Gold Coast region for use by clinicians during consultation with patients, to support assessment and referral to local services and supports.
• Increase awareness, engagement and utilisation of dementia pathways by local health care practitioners.

Description of Activity *

• Collaborate with Dementia Australia, other PHNs, Gold Coast Health and relevant stakeholders to develop optimal dementia clinical referral pathways, following best practice guidelines of care.

• Consultation with a broad range of stakeholders to support service mapping of current services, support groups and resources to inform localisation of dementia specific referral pathways.
• Collaborate and share dementia specific clinical referral pathways development through the Queensland HealthPathways Coordinator network to achieve state wide consistency in clinical pathway content.
• Promote, and monitor use of, Dementia Pathways and financially support GCH HealthPathways editing, maintaining and review of topics to ensure localisation of topics while supporting clinicians to provide best practice in the assessment, management and referral to local services and supports.

• Gather feedback from clinicians and primary care workforce on ease of use, appropriateness of information provided for clinicians and their patients, improvement suggestions, barriers and enablers to uptake
• Facilitate best practice dementia training and education opportunities, facilitated by Dementia Training Australia, for general practice audience to decrease diagnostic time and improve care quality, With linkages and promotion of Dementia specific HealthPathways as part of this training.

1

Activity Title *

Primary Care Improvement Program

Existing, Modified or New Activity *

Modified

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

To support general practices and other primary healthcare providers as relevant, to implement data informed Continuous Quality Improvement (CQI) activities using an evidence-based model of improvement through:
• supporting health practitioners and their teams to deliver data informed, high quality and safe health care to their communities on the Gold Coast
• support the integration of CQI including Clinical Audits into general practice workflow
• to progress CQI from GCPHN led to practice led
• support practices to meet the requirements of the PIP QI Incentive Payment
• integrate Digital Health requirements into all activities to support sustainable business systems and processes
• Support practices to maintain delivery of care to patients during the COVID-19 global pandemic response and recovery..

Description of Activity *

This program of work moves beyond general practice engagement activities by supporting the implementation of a wider program based on evidence-based best practice methods to achieve high performing primary care.
Based on Bodenheimer's 10 Building Blocks of High Performing Primary Care and utilising the Quadruple Aim to measure outcomes the Primary Care Improvement Program will focus on supporting General Practitioners, other members of the general practice team and primary healthcare providers where relevant to identify, using a

population health management and risk stratification tool, and implement CQI activities based on the needs of the practice population.

.

Each practice that enrols in this program has access to Helpdesk where support requests are triaged and an allocated GCPHN Primary Care Improvement Project Officer (PO) who supports practice staff, using a population health management and risk stratification tool, to identify their quality improvement (QI) goals and activities. The PO provides support to increase the practice team's confidence and abilities to independently lead QI initiatives. This includes identifying and implementing processes required to support the COVID-19 pandemic response and recovery.

In Scope AOD Treatment Type *

Indigenous Specific *

Yes

Indigenous Specific Comments

The aim of the activity is to increase the number of Aboriginal and Torres Strait Islander people with an annual health assessment completed in main stream general practice. Utilising a clinical audit tool under a quality improvement model general practice staff will be supported to identify Aboriginal or Torres Strait Islander peoples who have not had an annual health assessment completed.

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

To support the primary health care based COVID-19 pandemic response including the national roll out of the COVID-19 vaccine program and booster doses.

Description of Activity *

This program of work incorporates a coordinated support program to the key stakeholders identified including general practice, residential aged care, Aboriginal medical services, and GP led respiratory clinics. The support program includes:
• Dedicated support to general practices, AMS and GP led respiratory clinics participating in the COVID-19 vaccine program
• Access to a dedicated phone and email helpdesk service for key stakeholders
• Access to COVID-19 specific information via webinars and electronic communications
• Access to COVID-19 related resources via a dedicated webpage
• Maintenance of and update of COVID-19 pandemic response Health Pathway and COVID-19 vaccine Health Pathway

• Coordination and promotion of COVID-19 pandemic response and COVID-19 vaccine program related education and training for the region

• Dedicated support to residential aged care facilities to support access to a COVID-19 vaccine program for all residents
• Supporting the Gold Coast primary health care community to access an appropriate COVID-19 vaccine pathway
• Supporting the distribution of personal protective equipment (PPE) to eligible primary care services
• Supporting the distribution of emergency supply of COVID-19 vaccine related consumables.
• Regular reporting for Dept.
• Supporting Fit Testing of P2 Respiratory masks for general practice

This activity also supports the local Gold Coast General Practitioners, other Primary Health Care providers and the Gold Coast population to access credible and reliable information associated with the COVID-19 pandemic response and COVID-19 vaccine program.
