They <u>must</u> also: have <b>no carer or support person</b> who can help them, or not have a carer or support person they <b>feel comfortable or trust to support them</b> ; and be <b>eligible for government funded aged care</b> . In addition, they <u>should</u> have one or more of the following reasons for needing intensive support: difficulty communicating because of language or literacy problems; find it difficult to understand information and make decisions; be reluctant to engage with aged care providers or government; and/or be in an unsafe situation if they do not receive services.			Clinical Professional Development for <b>General Practitioners and Nurses</b> working in primary care in the Gold Coast Primary Health Network region.	<b>Nurses and aged care assistants</b> working in Residential Aged Care Homes (RACHs) or community aged care providers in the Gold Coast Primary Health Network region.
DESCRIPTION	The Complex Wound Clinic provides specialised wound management through a GP and NP with a special interest in wound management, who ensure continuity of care through communication with the patient's usual GP and specialist services.	The Urgent Care Clinics provide access to clinically appropriate urgent care in a non-hospital setting with no out-of-pocket costs for patients, including diagnostic services such as radiology and pathology.		Multi-disciplinary, team-based care of patients with endometriosis and/or pelvic pain. Offering Pelvic Pain Diagnostics (including Anorectal Manometry), Pelvic Floor Physiotherapy, and Allied Health including dietetics and psychology if required.	A 12-week intensive active lifestyle program providing bi-weekly, client-centred health education and exercise sessions to older people at risk of frailty. The program is run by a multi-disciplinary student team and overseen by Bond University academics and practitioners. It includes a free gym membership at Avanti Health Centre for the duration of the program.	A four-to-six month program providing both individual appointments and group-based movement sessions personalised to the patient's needs. It will screen and assess physical performance, nutritional status, medication management, cognition, mental health and social support. Home visits are available for high-risk patients.	In addition to the various health programs offered by the Mungulli team, the Yarn and Walk program provides a weekly group-based walking and education program led by a multi-disciplinary team of health experts. Sessions explore cultural activities, healthy eating, physical activity, and relaxation.	Care finders are <u>not</u> for everyone. They specifically help <b>vulnerable older Australians</b> who need <b>intensive assistance</b> to access aged care and other supports. Care finders can help clients: <ul style="list-style-type: none"><li>talk to <b>My Aged Care</b> on their behalf and arrange assessments;</li><li>attend and provide support at the assessment;</li><li>find and short-list aged care providers in their area;</li><li>complete forms and understand aged care service agreements;</li><li>check-in once receiving services and make sure everything is okay; and/or</li><li>connect to supports in the community, such as health, mental health, housing and homelessness, drug and alcohol services and community groups.</li></ul>			Wound Care training workshops to upskill practitioners who are responsible for the care and management of patients with chronic or complex wounds.	Wound Care training workshops to upskill nurses working in aged care who are responsible for the care and management of patients with chronic or complex wounds in RACHs.
