Value for Organisations

An interactive virtual workshop for those new to Immunisation, or with some experience, who would benefit from a small classroom setting learning the basics of 'how to do a catchup?' Develop an understanding of vaccination planning, and various schedules following the guidelines of the Australian Immunisation Handbook. Using simple scenarios your ongoing learning will be developed and tested with other practitioners in a small classroom setting. Review catch-up principles and scenarios, and advance your learning by asking the questions you need from your clinical setting in a supportive environment.

Learning Outcomes

By the end of this virtual workshop, you will have refreshed your knowledge on how to work through a basic catch-up and the processes involved. You will practice working through one or more scenario's using the Australian Immunisation Handbook Catch-Up Tables, and be provided with answers for any questions you might have.
