Other (please provide details)

Other Program Key Priority Area Description

Youth experiencing or at risk of homelessness

Aim of Activity \*

The service provides low to medium level primary care support to assist youth who are at risk of homelessness, or are homeless with or without mental health concerns. The service will increase primary care access and the efficiency and effectiveness of primary health care services for youth experiencing or at risk of homelessness. Support services to youth who are at risk of homelessness or are homeless was identified as a service gap in the local community. Specific objectives:

(1) Identify and support young people experiencing homelessness and those at risk of homelessness where it is demonstrated that there are physical, geographic, or other barriers to accessing primary care services.

(2) To provide a connection point to primary care and other appropriate services that are available to support ongoing needs of

people in usual business hours.

(3) Address the health impacts of youth experiencing homelessness or at risk of homelessness including but not limited to mental health, alcohol and other drugs

#### **Description of Activity \***

The youth-based homelessness services are to be delivered as a co-located services from the headspace office at Southport. This co-location arrangement will provide a seamless way for youth in need to be referred across to the services for support with issues that are impacting on stability of their housing.

The aim of this service is:

- Address gaps in primary care services to youth who are or at risk of homelessness particularly in the northern Gold Coast, an area of socioeconomic disadvantage and associated higher needs.
- To increase access to clinical supports for youth at risk of homelessness and identify/address the associated health impacts of homelessness. Onward referral of people to primary care and other community-based supports are a key outcome of this service.
- To provide a supplement service to youth at risk of or homeless with health needs who would otherwise present to hospital emergency departments.
- Coordinate with specialist homelessness services via outreach to identify youth who are at risk of or homeless to address barriers to primary health care.

These services will play a critical role in supporting and improving health and wellbeing outcomes through:

- Provision of suitable viable alternatives to hospital emergency department services.
- Provision of community based primary care to people in the community that do not have regular access to mainstream MBS services.
- Provision of suitable clinical support to people presenting with the health impacts associated with homelessness and to provide connection/onward referral of people to appropriate services.

Service delivery will commence in January 2025 with a welcoming, 'no wrong door' option to accessing support, advice, referrals to other services and care planning to mitigate risks or issues impacting on housing stability. Services will operate Monday to Friday 8 am – 5 pm Monday to Friday.

#### Needs Assessment Priorities \*

#### **Needs Assessment**

Gold Coast PHN HNA 2024

#### **Priorities**

Priority	Page reference
Higher rates of mental ill health and mental health related ED presentations among people experiencing homelessness.	102
Cost, transport and stigma limit the ability of people experiencing homelessness to access health care, including health checks, preventative and follow up care.	102
Out-of-pocket costs and safety concerns limit access to health services for people experiencing family and domestic violence.	102
Reported high prevalence of vaping, particularly among young people.	221
Reduced bulk billing and reducing GP per capita rates leading to poorer access for some vulnerable people.	57
Growing numbers of people with socioeconomic	71

disadvantage and associated higher need,
especially in the northern Gold Coast.

Program Key Priority Area \*

**Population Health** 

Other Program Key Priority Area Description

#### Aim of Activity \*

To gather an integrated body of evidence and recommendations to inform 26/27 commissioning activities for people in housing stress and other intersecting needs across the mental health, alcohol and other drugs and suicide spectrum.

#### **Description of Activity \***

Engage competent qualified consultants to develop evidence based strategic recommendations that will inform the future commissioning of integrated services for people experiencing homelessness and intersecting vulnerabilities. Specific objectives include:

- Improve access and quality of care for people experiencing housing stress and other vulnerable populations: Explore how services can better support people facing housing stress and other challenges, improving both access and care quality.
- Recognise and respond to intersectionality: Identify how overlapping vulnerabilities affect people and recommend ways services can better support diverse community needs.
- Inform optimum use of modes when commissioning / recommissioning services: Guide future investment in Gold Coast services by identifying gaps, reducing duplication, and improving delivery across digital, face-to-face, and outreach models.
- Provide input into co-design of Medicare Mental Health Centre: Confirm and build on current evidence to support planning for a new federally funded mental health centre in the area.

Activities include:

• Assess needs, apply best practice, and inform commissioning to improve access, equity, coordination and service quality for

homeless and intersectional populations.

- Assess and optimize digital, outreach, and face-to-face service modes and apply these approaches in commissioned service contracts where applicable.
- Assess Workforce Capability for People with Intersecting Needs and embed these in commissioned service contracts where applicable.

#### **Needs Assessment Priorities \***

#### **Needs Assessment**

Gold Coast PHN\_HNA 2024

#### **Priorities**

Priority	Page reference
Higher rates of mental ill health and mental health related ED presentations among people experiencing homelessness.	102
Cost, transport and stigma limit the ability of people experiencing homelessness to access health care, including health checks, preventative and follow up care.	102
Growing demand for acute care, specialised rehabilitation and ongoing care for GCHHS catchment residents with spinal cord injuries unable to secure timely access to current statewide service.	20
Increasing acute demand requires improvement in early intervention, prevention and community support for mental health.	221
Insufficient capacity in sub-acute community based residential mental health services.	221
nsufficient resourcing to ensure supported, psychologically safe, meaningful engagement of people with lived experience in planning and service delivery.	221
Reported high prevalence of vaping, particularly among young people.	221
Prevalence of select chronic disease risk factors (low vegetable intake, high BMI, alcohol) is high and/or significantly increasing for adults in Gold Coast region.	71

Existing, Modified or New Activity \*

Existing

#### **Activity Priorities and Description**

#### Program Key Priority Area \*

Other (please provide details)

#### Other Program Key Priority Area Description

**Culturally and Linguistically Diverse Populations** 

#### Aim of Activity \*

To increase and improve the access and referral pathways to health and related services for people who are within the Culturally and Linguistically Diverse (CALD) community.

To highlight well-established, trusted, and respected service providers already specialising in engaging with hard-to-reach groups for the CALD community.

To provide an integrated approach to navigating services (primary care and other services) and enhancing cultural awareness and understanding across the Gold Coast region for CALD consumers.

#### For example:

- General Practitioners.
- Allied Health professionals.
- Primary and secondary health care services including mental health, alcohol and other drug treatment and suicide prevention services as well as other chronic disease services.
- Child and Family services.
- Homelessness services.
- Legal services.

- Financial support services.
- Housing services.
- Employment services.
- NDIS.

#### **Description of Activity \***

This is an existing GCPHN activity, that is funded through CF3 in the Core Funding Schedule.

The After-Hours Community Connector Program on the Gold Coast is delivered by CURA. This service provides culturally sensitive support to people in the CALD community to support their access to culturally safe service/s when they are unable to access treatment in usual business hours due to other personal, work or family commitments.

People have access to a clinical worker and peer worker to assist with assessment and planning around the priority care needs. Peer workers assist with wrap around support and coordination of planned supports.

#### This service focuses on:

- Increasing access to community-based support for people in the CALD community who cannot wait for treatment in usual business hours; onward referral of people to primary care and other community-based supports are a key outcome of this service.
- Providing a service option for people in the CALD community in the after-hours period who would otherwise present to hospital emergency departments.

This service plays a critical role in supporting and improving the health and wellbeing of people in the CALD community to achieve outcomes through:

- Provision of suitable viable alternative to hospital emergency department services.
- Provision of community-based service support to people in the community that do not have regular access to mainstream MBS services in the after-hours period.
- Provision of suitable clinical and peer support in the afterhours period to support people presenting with health needs and to provide connection/onward referral of people to appropriate services.

Services will be provided in the after-hours period via telehealth, outreach and place-based services located where higher proportions of people in the CALD community reside (ie. Ormeau-Oxenford). Consumers will be actively supported with treatment, including a plan for linkage to suitable services (primary care and/or other services) in business hours for ongoing support.

#### **Needs Assessment Priorities \***

#### **Needs Assessment**

Gold Coast PHN\_HNA 2024

#### **Priorities**

Priority	Page reference
Large and growing Pasifika community with higher reported health needs and challenges accessing healthcare.	102
Gaps in cultural capability across service providers and clinicians, particularly relating to sensitive issues such as mental health, AOD and FDV.	102
People from multicultural backgrounds have higher reported prevalence of diabetes, arthritis, and heart disease.	102
Limited effective use of translation services in primary care and ambulance response services.	102
Migrants are often unfamiliar with the Australian health system and have lower health literacy.	102

Insufficient service capacity to meet growing demand due to population growth, particularly in northern Gold Coast.	20
Inefficient system navigation leads to delayed connection of patients with suitable mental health, AOD and suicide prevention services.	221
Care coordination and information sharing among mental health, AOD, and suicide prevention services are often inefficient in particular transitions from acute or inpatient care to community services.	221
Reduced bulk billing and reducing GP per capita rates leading to poorer access for some vulnerable people.	57
Growing numbers of people with socioeconomic disadvantage and associated higher need, especially in the northern Gold Coast.	71

# **Activity Consultation and Collaboration**

# Consultation

This activity has been informed by consultation that has occurred over several years throughout various co-design processes for AOD and mental health services, during AOD specific working groups and the development of needs assessments. Recently building on this, the Joint Regional Plan consultation has highlighted the absence and need for community-based after-hours

treatment to specifically support people in the CALD community, as there is currently no dedicated service in the community providing this service in the out of usual business hours period (other than the After-Hours Safe Space service mentioned above).

#### Collaboration

- • CURA Multicultural service Major CALD service provider in Gold Coast region.
- Primary Care Community Services Major stakeholder responsible for delivery of the Gold Coast Head to Health Phone Service.
- Gold Coast Hospital and Health Service (GCHHS) Key interested party in enabling/supporting the people with primary care needs that can be met in the community, so as to divert people from hospital emergency department/s.
- Gold Coast Hospital and Health Service (GCHHS) Senior Leadership and Directors Support to inform service opportunities, gaps, enablers, and integration.
- Lives Lived Well After Hours AOD service provider; possible referral in/out pathway.
- QuIHN After Hours AOD service provider; possible referral in/out pathway.
- Primary and Community Care Service After Hours Safe Space service provider; possible referral in/out pathway.
- QLD Health Mental Health and Alcohol and Other Drugs Branch Interested party in significant service/system changes that may negatively impact on presentations to hospital emergency department/s.
- Gold Coast Homeless Network and Homeless Outreach Team Possible referral in/out pathway.
- General Practice Major primary care service provider in Gold Coast region Possible referral in/out pathway.

**Activity Title \*** 

Alcohol and Other Drugs After Hours – Treatment

Existing, Modified or New Activity \*

Existing

#### **Activity Priorities and Description**

Program Key Priority Area \*

Alcohol and Other Drugs

Other Program Key Priority Area Description

#### Aim of Activity \*

The community-based alcohol and other drugs (AOD) after hours service aims to support people requiring specialist treatment who cannot access this treatment during traditional business hours.

This activity aims to:

- Increase availability of AOD treatment services in the community.
- Increase timely access to specialist AOD treatment services for individuals and their families.
- Improve AOD treatment outcomes for clients.
- Reduce harm associated with drugs and alcohol use, with a focus on methamphetamine use.

#### **Description of Activity \***

After Hours Alcohol and Other Drugs Treatment services on the Gold Coast will continue to be delivered by two providers, Lives Lived Well (LLW) and QuIHN. The aim of these services is to:

- Increase access to AOD services for people who cannot wait for treatment (primary care and/or other treatment) in usual business hours.
- Increase access to AOD services for people who are unable to access AOD treatment in usual business hours due to other personal, work or family commitments.
- Provide a service option to people with AOD treatment needs in the after-hours period who would otherwise present to hospital

emergency departments.

These services will play a critical role in supporting and improving health and wellbeing outcomes through:

- Provision of suitable viable alternatives to hospital emergency department services.
- Provision of specialist AOD service support to for people in the community that do not have regular access to mainstream MBS services in the after-hours period.
- Provision of suitable AOD services to consumers who cannot access services (primary care or other services) in usual business hours.

GCPHN's evaluation of these services (completed in November 2021) provided information on value and effectiveness of these services, with value seen in its ability to meet a previous unmet AOD service need for people in the community outside usual business hours.

Service delivery in the evenings and on Saturdays is currently supporting access for individuals who had previously accessed hospital emergency departments, or who had been unable to attend individual or group support during usual business hours (sociable business hours) due to work commitments, family commitments, issues with transport and/or complex family matters.

#### **Needs Assessment Priorities \***

#### **Needs Assessment**

Gold Coast PHN HNA 2024

# **Activity Priorities and Description**

#### Program Key Priority Area \*

**Population Health** 

#### Other Program Key Priority Area Description

#### Aim of Activity \*

The service provides low to medium level primary care support from a Nurse Practitioner to support youth with mental health concerns who are at risk of homelessness or are homeless.

Specific objectives:

- (1) Identify and support young people experiencing homelessness and those at risk of homelessness where it is demonstrated that there are physical, geographic, or other barriers to accessing primary care services.
- (2) To provide a connection point to primary care and other appropriate services that are available to support ongoing needs of people in usual business hours.

#### **Description of Activity \***

The youth-based services to be delivered as a co-located service from headspace office at Southport. This co-location arrangement will provide a seamless way for youth in need to be referred across to the services for support with issues that are impacting on stability of their housing.

The aim of this service is:

• To increase access to clinical mental health support for youth at risk of homelessness including onward referral of people to primary care and other community-based supports are a key outcome of this service.

• To provide a clinical service option to people with mental health needs who would otherwise present to hospital emergency departments with heightened levels of mental health concerns.

These services will play a critical role in supporting and improving health and wellbeing outcomes through:

- Provision of suitable viable alternatives to hospital emergency department services
- Provision of community based mental health service support to people in the community that do not have regular access to mainstream MBS services
- Provision of suitable clinical support people presenting with mental health needs and to provide connection/onward referral of people to appropriate services

Service delivery will commence in January 2025 with a welcoming, 'no wrong door', option to accessing support, advice, referrals to other services and care planning to mitigate risks or issues impacting on housing stability. Services will operate Monday to Friday 8 am – 5 pm Monday to Friday.

#### **Activity Commissioning**

Please identify your intended procurement approach for commissioning services under this activity:

Not Yet Known: No

Continuing Service Provider / Contract Extension: Yes

**Direct Engagement:** No **Open Tender:** No

Expression Of Interest (EOI): No

Other Approach (please provide details): No

Is this activity being co-designed?

Yes

Is this activity the result of a previous co-design process?

No

Do you plan to implement this Activity using co-commissioning or joint-commissioning arrangements?

No

Has this activity previously been co-commissioned or joint-commissioned?

No

#### Decommissioning

No

#### **Decommissioning details?**

Yes (pending funding continuing beyond 30/6/25). Service will manage down referral numbers from 1/5/25 if ongoing funding for the service is not forthcoming.

# Co-design or co-commissioning comments

GCPHN has co-designed the service in partnership with preferred provider. New service model has been developed along with new referral management and triage procedures. Service will co-locate with headspace to support transition of care and ease of referral for eligible youth.
