

Looking for your next quality improvement focus area for 2025?

Join the new quality improvement Chronic Obstructive Pulmonary Disease (COPD) project.

It is estimated that one in 13 Australians over the age of 40 years are suffering from symptoms of COPD, with nearly half (50%) remaining undiagnosed. On the Gold Coast, the rate of COPD is above the national average with 2.3% of the Gold Coast population having a COPD diagnosis.

Why should you get involved?

- ✓ Improved patient outcomes
- ✓ Review current active COPD patients care management
- ✓ Enhance practice capabilities & business modelling
- ✓ GP participation in a clinical audit for reviewing performance and measuring outcomes.
