November End of Year Celebration		

“Throughout the trial, I’ve had regular check-ins with my team, starting off fortnightly and eventually moving to tri-monthly visits.

I’ve never felt like I was “just a number”. The trial team have been a constant support over the past five years, and I always look forward to seeing them. I’ve never felt that it's just a clinical appointment - it feels more like a friendly catch-up with a few laughs along the way.

Overall, my experience with the clinical trial has far exceeded my expectations. If you’re looking to prioritise your health and possibly make a difference for others, I highly recommend joining the Griffith Clinical Trial community.

Carissa
Rheumatology Trial Participant

Visit us!

Tram

The tram, G:Link, has two stops on campus. The G:Link line begins at the Gold Coast University Hospital, travels south through Southport, Surfers Paradise and Broadbeach, and terminates at Pacific Fair shopping centre. See the G:Link website for details on stations, tickets and times.

Bus and train

You can catch the bus to our Gold Coast campus from a variety of locations, including nearby train stations at Helensvale, Nerang and Robina. There are also a number of bus routes that connect to the tram.
