

New Chronic Condition Management Framework commences July 1, 2025

To simplify, streamline, and modernise the arrangements for health care professionals and patients.

- MBS items for reviewing GPMPS and TCAs will cease on 1 July 2025
- Replaced with a single GP chronic condition management plan (**GPCCMP**).
- Framework ensures the patients preferred doctors completes their GPCCMP.
- For patients with one or more chronic medical conditions (present for at least 6 months or are terminal).
- There is no list of eligible conditions to access GPCCMP. It is up to the GP clinical judgment.
- Patients registered through MyMedicare will be required to access the GPCCMP items through the practice where they are registered.
- Patients should be transitioned to the new arrangements through the preparation of a GPCCMP
- GPs will refer patients with a GPCCMP to allied health services directly.
- Contact your **GCPHN Engagement Officer** to discuss how to get prepared.
