Spirometry Training for General Practitioners

Gold Coast Primary Health Network, 14 Edgewater Court, Robina

Gold Coast Primary Health Network, in partnership with National Asthma Council of Australia, invites general practitioners to a one-day Spirometry Training workshop.

The National Asthma Council Australia (NAC) Spirometry Training Course provides comprehensive training in the application, measurement and interpretation of expiratory spirometry for primary care health professionals.

The 6-hour interactive workshop includes hands-on components to allow participants to apply their new knowledge in a practical setting. Participants may be eligible for continuing professional development (CPD) points. The course is the result of an extensive consultation and development process involving members of the Australian and New Zealand Society of Respiratory Science (ANZSRS) and the NAC's expert advisory group.

Learning Outcomes

- Increase knowledge and awareness of the role of spirometry in primary care
- Develop practical skills to recognise and perform high quality spirometry
- Understand interpretation and clinical implications of spirometry results, including differential diagnosis
- Increase knowledge and awareness of the importance of spirometer quality assurance and its implementation
- Learn strategies to incorporate spirometry testing systematically into routine clinical practice
- Increase confidence in performing, understanding and implementing spirometry
