

Queensland Health Immunisation Unit

Supporting General Practice Nurses with Immunisation

We're here to help you with the vital role you play in immunising the community

How we can support you

Free online learning for practice nurses and providers

National and Queensland immunisation updates and guidance

Immunisation resources (reference cards, factsheets)

Vaccine orders, distribution and vaccine management

Support with Australian Immunisation Register (AIR) reporting

Education and Training for Immunisation Providers

- ✓ **Immunisation Courses** (via Cunningham Centre) free self-paced eLearning
- ✓ **Workshops and Webinars**
- ✓ **Australian Immunisation Handbook** – National clinical guidance
- ✓ **Queensland Immunisation Program website** – Clinical guidance for Immunisation Providers
- ✓ **Dedicated Queensland Health Immunisation Education website** – Scan the QR code below

How general practice supports immunisation

-  **First point of contact:** families and individuals often rely on their GP or practice nurse for trusted advice.
-  **Impact of your recommendation:** patients are most likely to immunise if their GP or practice nurse recommends it.
-  **Community protection:** supporting immunisation reduces preventable illness at both an individual and population level.
