

National Cancer Screening Register (NCSR) Notifications in Best Practice

- Make a concerted effort to respond to NCSR Notifications relating to bowel cancer screening and follow-up in Best Practice.
- Once the NCSR is integrated with BP, where an action is required, a notification will be displayed in the Notifications section of the BP Premier Patient Record. Double click the notification to launch the NCSR Hub or to open the NCSR form. To complete the action, complete the relevant form in the NCSR Hub.

A visual of what the notification looks like is shown in the image below

Notifications:		
Type	Due	Reason
NCSR (Bowel)		Overdue for bowel cancer screening
NCSR (Cervical)		Follow up action required
Preventive health	28/08/2020	A smoking history should be recorded!
Preventive health	28/08/2020	There is no record of any cervical screening for this patient
Preventive health	28/08/2020	Vaccination against shingles should be considered!

NOTE: If NCSR is enabled, NCSR notifications cannot be turned off

The notification may indicate that the patient is overdue for screening, or that a GP assessment or referral is required.

Notification	Reason
Overdue for bowel cancer Screening- NCSR (Bowel)	Information in the NCSR indicates the patient is overdue for bowel screening.
Positive FOBT - GP Follow up required - NCSR (Bowel)	Information in the NCSR indicates the patient has had a positive iFOBT result, and requires follow up by a Healthcare Provider, and completion of the GP Assessment Report.
Positive FOBT- Colonoscopy outcome required - NCSR (Bowel)	Information in the NCSR indicates the patient has had a positive iFOBT result and a colonoscopy result, though the Colonoscopy Report has not been received by the National Bowel Cancer Screening Register.
