

ONE INTEGRATED PLACEMENT

A MORE CONNECTED HEALTHCARE WORKFORCE

Give students insight and experience into how general practice, community and hospital care can work together through an integrated clinical placement. GCPHN is inviting GPs and general practices to host students in a child and women's health-focused placement.

Why participate?

- → Help shape the next generation of healthcare professionals
- → Share your expertise in caring for children, women and families
- → Give students a deeper understanding of primary care, including prevention, early intervention and continuity of care
- → Help students understand how health services work together to deliver coordinated care
- → Choose from set placement dates
- → Access dedicated support and teaching resources

Register your practice to host a student.
