

KIA ORA! Just moved to Queensland from New Zealand?

**Make sure your tamariki
are up to date with their
Queensland immunisations.**

Even though we're neighbours, our
immunisation schedules are different.

While your child may have had all their
immunisations on time in New Zealand,
they might not be up to date with the
Queensland immunisation schedule.

Talk to your immunisation provider or
local doctor to find out if there are any
gaps and to create a catch-up schedule
to get your child up to date with their
immunisations.

Having immunisations on time will give
your child the best protection from
serious infections, now and in the future.
